//

Today's textile industry is built on an outdated linear, take-make-dispose model and is hugely wasteful and polluting. The Ellen MacArthur Foundation's report 'A new textiles economy: Redesigning fashion's future' presents an ambitious vision of a new system, based on circular economy principles, that offers benefits to the economy, society, and the environment. We need the whole industry to rally behind it."

- Ellen MacArthur

Vision, mission and values

Mission

The aim of this organisation is to facilitate the design of environmental products and services in the clothing industry via partnership and consulting, while converting value from small designers and communities with local knowledge into high quality products.

Vision

The organisation envisages a future where people make informed choices enabling sustainable product purchase while contributing to the United Nations Sustainable Development Goals.

Values

- Sustainable consumption and production
- Green innovation
- Social responsibility
- Trust
- Gender equality
